

EXCLUSIVELY FOR INDUSTRIAL AND INSTITUTIONAL USE

Intelli-Zyme

Helps Remove Drain & Fruit Flies
Breaks Down Long Chain Fatty Acids
Inhibits Production of Odors
Clings to The Drain Line Walls
Degrades Organic Waste
Enhanced With Natural Citronella
Over 400 Billion Safe Bacteria Per Gallon

CAUTION

KEEP OUT OF REACH OF CHILDREN
See Side Panel For Additional Cautions

DIRECTIONS FOR USE

PRE-START If drain is used infrequently, moisten drain by pouring 1 to 2 gallons of warm water into drain. For ph applications apply INTELLI-ZYME at low use times, such as the end of the day once the sanitation process has been accomplished.

START Apply 8 ounces to each drain. Pour around the edge of the drain in order to coat the side walls of the drain. Repeat application for 5 to 7 days or as needed.

PREVENTIVE MAINTENANCE Apply 4 to 8 ounces per drain every week.

FOR OTHER AREAS Sinks, grates, dumpsters, garbage cans etc., remove heavy surface buildup from area. Spray or pour INTELLI-ZYME until completely saturated. Repeat as necessary.

KEEP OUT OF REACH OF CHILDREN

Precautionary Statements

Hazardous to Humans and Domestic Animals

FIRST AID

EYES: Rinse with water for 15 minutes and call a physician immediately.

INGESTED: Induce vomiting only if advised by a physician. Call a physician immediately.

IF INHALED: Remove person to fresh air. If breathing problems develop, Call a physician immediately.

Intelli-Zyme

DRAIN FLY-ODOR-WASTE CONTROL

This highly concentrated thick bacterial formula consumes buildup that accumulates over time in drains, grease traps, dumpsters, garbage cans, sinks, etc.

INTELLI-ZYME next generation microbes germinate rapidly by sensing and identifying the specific food source such as long chain fatty acids, protein, carbohydrates, grease, oil, and fat, which are a primary component of buildup in and around food producing areas.

Foul odors are directly addressed by attacking the normal biological production of odor causing compounds like hydrogen sulfide and rancid fatty acids are the stench of food degradation.

Fruit flies, drain flies, gnats and other food preparation dwelling insects are virtually unattracted to the customary area where INTELLI-ZYME is used on a regular preventative maintenance basis.
