

STATION1

FLOATING LIFT STATION CLEANER

An Industrial, Municipal Formula developed for use in Lift Stations. **STATION1** will break down the accumulation of debris which builds up on the walls of lift stations. No brushing or scrubbing is required because **STATION1** is enhanced with rapid emulsification properties. Removes most sewer odors, oils and gases by removing the source of the odor.

DEVELOPED FOR THE REMOVAL OF:

SEWAGE MAGNESIUM SOAP
GREASE FATTY ACID

DIRECTIONS

Pour **STATION1** directly into the Lift Station. For ideal performance an 8 to 12 inch layer is required. The fluctuation of the water level during the operation of the Lift Station will degrease and clean the side walls of the Lift Station wall.

Individual Lift Station activity will determine the necessary frequency of application. One application can last up to 3 months. Consult your Beta Technology account manager for additional information.

EXCLUSIVELY FOR INDUSTRIAL & INSTITUTIONAL USE

STATION1

FLOATING LIFT STATION CLEANER

- *Rapid Emulsification Properties*
- *No Brush or Scrub Concentrate*
- *Breaks Down Vertical Accumulation of:*
1) Sewage 2) Magnesium Soap 3) Fatty Acid 4) Grease
